

**Poultry**

**Eggshell Powder**

**Calcium Carbonate from Eggs**

The ingredient is produced using a new, chemical-free, patented process that separates naturally refined calcium carbonate from other parts of the eggshell. Eggshell powder is food-grade calcium carbonate that exceeds 96-percent purity, with ultra-low levels of lead, mercury and other contaminants. It is produced in the United States and exceeds all federal and state government standards, including California Prop 65.

**Appearance** White powder or white powder with brown specs (from brown eggshells)

**Content**

Calcium carbonate:	Min 96%
Loss on Drying :	Max 2%
Lead:	<.002 ppm
Mercury:	<.002 ppm
Arsenic:	<.002 ppm

**Microbial**

Standard Plate count:	<1000 /g
E. Coli:	<10 /g
Staphylococci;	<10 /g
Coliform:	<10 /g
Salmonella:	Negative

**Storage:** Shelf life, stable, indefinite at ambient air, preferably stored at 75 degrees F or less.
